Do it with a Harley-Davidson Motorcycle

Harley-Davidson "World's Champion"

One of the attractions of owning a Harley® is that it can be easily customized to reflect its owner's motorcycling tastes...

Knowledge gained from nearly ninety years in the motorcycle business, plus a total commitment to quality, have resulted in a line of touring and custom accessories that not only look great but fit as well as original equipment components.

Throughout this catalog are hundreds of accessory ideas that can be combined in countless ways to create a virtually one-of-a-kind motorcycle.

All it takes is Genuine Harley-Davidson parts and accessories and a little imagination.

4-SPEED EVOLUTION® SPORTSTER® SECONDARY BELT DRIVE KIT
Designed and tested by Harley-Davidson® engineers, this complete kit offers you an alternative to factory equipped rear chain drive. For years 1200/1340 Big Twin owners have reaped the benefits of secondary belt drive—less overall maintenance (i.e. lubrication, adjustments, etc.) and smoother power transmission. Belt drive also runs quieter since the polyurethane composition belt cushions contact with the sprockets. Think of it this way... the less time you have to spend on maintenance... the more time you can spend enjoying your Sportster!!!

Kit includes: 1" inch aramid fiber Poly-Chain® belt with Sportster logo; 61 tooth rear sprocket with hard-chromed teeth and chrome sprocket flange; 27 tooth front sprocket; chrome belt guard stamped with "Harley-Davidson" logo and support brackets allowing for installation on models with various swingarms and shocks; polished transmission sprocket cover; special crankcase counterbore tool; lower belt guard/delrin deflector; all necessary mounting hardware; comprehensive installation instructions that include a belt drive adjustment chart and maintenance tips.

40110-85 Fits '86-'90 4-speed XL models

Harley-Davidson® 4-speed Evolution XL Secondary Belt Drive Kit includes all necessary components and comprehensive installation instructions.

5-SPEED SPORTSTER® SECONDARY BELT DRIVE KIT

Converts '91-'92 5-speed chain-drive XL models to belt drive. This complete kit includes all components needed to enjoy the benefits of Harley-Davidson Poly-Chain belt drive technology, such as lower overall maintenance and smoother power transmission. Belt drive also runs quieter. This kit includes Aramid fiber belt with Sportster logo, rear sprocket with hard-chromed teeth and front sprocket with hardened teeth, chrome belt guard, lower delrin deflector, and comprehensive installation instructions. Harley-Davidson Chrome Sprocket Cover, P/N 40279-91 is the perfect finishing touch (must be purchased separately).

40111-91A Fits '91-'92 5-speed XL883/Hugger® models

XL BELT-DRIVE TRANSMISSION SPROCKETS

FAT BOY® LEATHER SADDLEBAG KIT

Styled by Willie G. to complement the overall styling of the Fat Boy and designed to tuck in neatly above the unique FLSTF shotgun-style exhaust system, these custom leather saddlebags are made from double tanned, full grain leather, drum dyed for full penetration using only premium quality domestic steer hides.

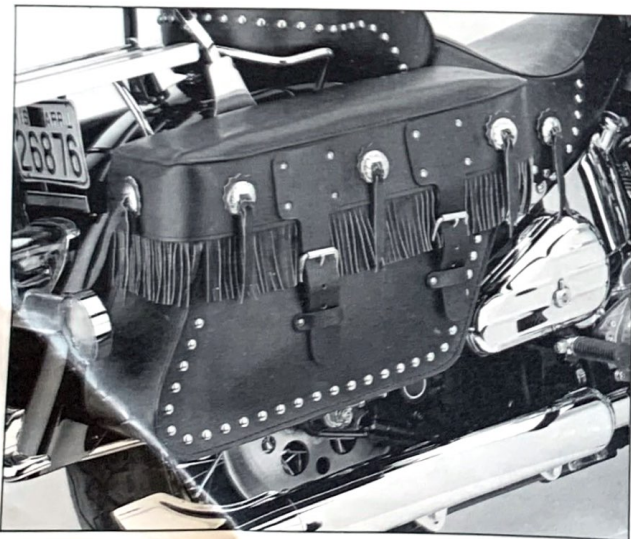

Saddlebags feature a unique mounting system which incorporates molded lightweight, high density polyethylene backs with reinforcement ribs for long lasting structural durability, and lower gussets that have been internally reinforced with steel L brackets for shape retention. Other custom features include lids with hand-laced top panels and pigskin-style side panels to match those of the stock seat and fuel tank strap, and angled leather lid straps which follow the aesthetic lines of the bags. Includes die cast flange style roller buckles featuring recessed "Harley-Davidson® U.S.A." logo. Buckles are polished, copper and nickel plated for a long-lasting, quality finish.

Kit also includes chrome saddlebag supports, all necessary mounting hardware, and installation instructions. Directional relocation kit P/N 68548-87 is required for installation on FXST/FXSTS models.

90833-90A Fits '90-'92 FLSTF and '84-'92 FXST, FXSTS, FLST models

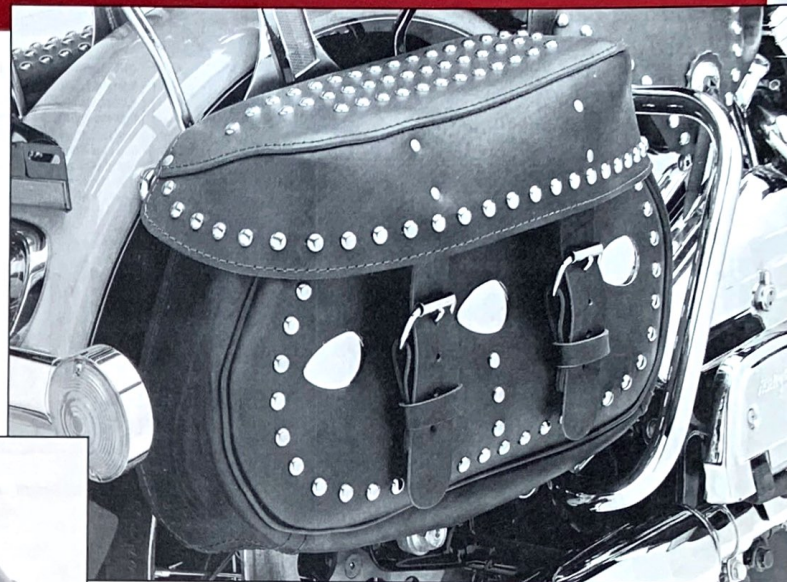

Hand-laced saddlebag lid panels match Fat Boy seat and tank panel lacing.

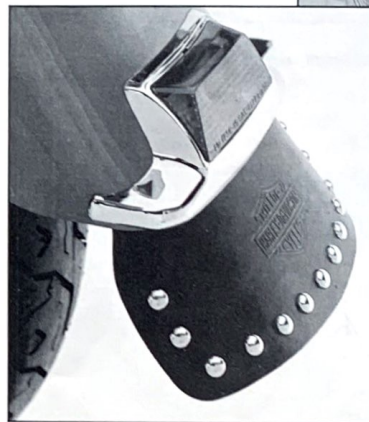

FRINGED LEATHER SADDLEBAG KIT

Here's the nostalgic look that Harley-Davidson introduced as standard on the factory production Heritage Classic in 1987. These large-capacity bags feature full grain 8-ounce leather supported by an internal metal framework for shape retention and rigidity. External mounting brackets fasten the bags using a special lock chrome studs, adding an extra measure of security. Includes decorative chrome studs, fringed leather lids with conchos, large leather straps embossed with Bar & Shield logo, and convenient easy-less, nostalgic style of the '50s. See page 45 for H-D® Leather Dressing. Includes all necessary mounting brackets, hardware, etc. 90860-86 Fits '86½-'92 FLST models (except FLSTF)

HERITAGE STYLE SADDLEBAG KIT

Constructed from top grade cowhide, these bags were designed with classic styling in mind. Each saddlebag is decorated with chrome studs and three chrome-plated brass medallions coined with the Harley-Davidson® Bar & Shield. Saddlebag tops have rivet reinforced corners and are secured with heavy leather straps and roller-type, easy access buckles. The back is computer designed, ABS material, molded to fit the brackets, holding the saddlebag close to the fender for a more contoured fit. Necessary hardware and instructions are included. (Turn Signal Relocation Kit P/N 68548-87 is necessary for FXST and FXSTS models.) 90835-90A Fits '86½-'92 FLST, '84-'92 FXST, FXSTS (will not fit Fat Boy®)

LUGGAGE RACK DUFFEL BAG—Convenient, functional duffel bag adds the perfect place for clothing and essential items you will need when you arrive at your destination. Once there, such as at HOG® rallies, use it to store your helmets (large enough for 2 helmets) when not riding. Designed exclusively for use with H-D® Premium Tour-Pak luggage rack. Velcro fasteners easily attach to rack tubes and a unique shoulder strap doubles as a mounting band. Constructed from tough 1000 denier black nylon which is urethane coated on the inside for water resistance. The full-length zipper has a protective flap. Smaller zippered end compartment is perfect for storing those touring essentials like maps and gloves. Subtle reflective stripe and oval patch with embossed Bar & Shield logo completes the trim. 91758-91 For use on Premium Tour-Pak Luggage Rack P/N 53665-87 (pictured above)

EXPANDABLE LUGGAGE RACK DUFFEL BAG

Newest Harley-Davidson® accessory for touring riders includes the same features as P/N 91758-91 (pictured above) with one important additional convenience... it expands! This larger capacity duffel bag is made from tough urethane-coated 1000 denier nylon and incorporates a full-length zipper which wraps around the side gusset panels. When unzipped, extra inside storage capacity adds a convenient place to put your riding gear when stopping for breakfast, lunch or dinner. When the extra space isn't needed, simply zip together to return the bag to its regular, lower profile size. Velcro® fasteners easily attach to luggage rack tubing and a unique shoulder strap doubles as a mounting band. Main compartment zipper is covered by a protective flap secured with Velcro closure. Trimmed with a reflective stripe and oval patch embossed with Bar & Shield logo. 91753-92 For use on Premium Tour-Pak Luggage Rack P/N 53665-87 (pictured top right)

CLASSIC CHROME CALIPER/ROTOR COVER KIT

The Harley-Davidson® "Classic" style caliper and rotor covers are just the ticket to complete the customizing of a full dresser. These covers are hand polished by American craftsmen and include the highest quality chrome plating available, which consists of nickel and chrome over a copper coat for a long-lasting lustre. The special contours complement the front end of Tour Glide® and Electra Glide® fairings; the rotor covers are not flat — they are domed to provide an aesthetically agreeable appearance that's consistent with the lines of the motorcycle. Caliper covers include an etched aluminum nameplate with script "Classic" logo. Kit includes a pair of rotor and caliper covers, mounting brackets, hardware, special speedometer cable routing bracket, and instructions.
43068-89A Fits '87-'92 FLT, FLHT, FLHS models

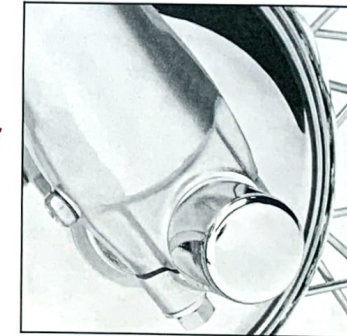

Brushed aluminum nameplates are riveted to caliper covers. Raised "Classic" script is diamond cut and contrasts the subtle Harley-Davidson® — Milwaukee, U.S.A. graphics.

CHROME FORK SLIDER COVERS WITH RUNNING LIGHTS

FLHS CHROME HEADLAMP NACELLE

The ultimate accessory for dresser riders who appreciate the sporty styling of FLHS models. One-piece formed steel nacelle replaces the factory-equipped gray plastic cover and provides an impressive visual enhancement reminiscent of the nostalgic styling of yesteryears FLH models. Proudly made in the U.S.A., its mirror-like finish is the result of careful hand polishing followed by a layer of copper plating. A delicate hand buffing operation then prepares the copper base for layers of nickel and chrome for a truly brilliant, corrosion-resistant finish. A subtle, script Harley-Davidson® logo stamped into the lower right corner adds a finishing touch of authenticity. Includes top edge trim molding, speedometer cable grommet, all necessary mounting hardware and installation instructions. AVAILABLE APRIL 1992.
67680-91 Fits '87-'92 FLHS models and '83-'85 FLHT models

SOFTAIL® DUAL FISHTAIL EXHAUST SYSTEM

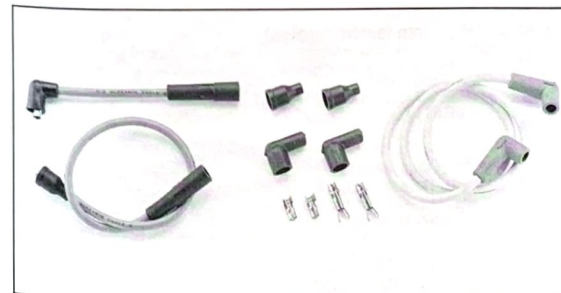

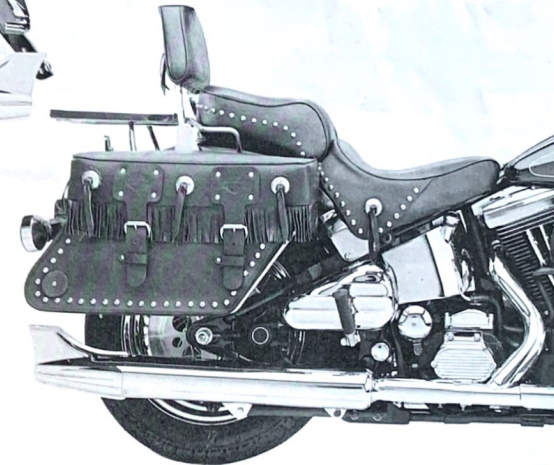

Harley-Davidson® latest 2-into-2 dual exhaust system features fishtail style end caps and blends in beautifully with the nostalgic look of the Softail. It was designed and engineered to meet rigid specifications and fitment criteria and is proudly manufactured in the U.S.A. to assure H-D® quality standards. The left-side rear cylinder header pipe wraps neatly around the inner primary, which keeps the pipe and muffler tucked away from rider and passenger and offers a clean, well integrated appearance. The system accommodates popular H-D accessories such as rear dresser bars, passenger floorboards, and Heritage Classic factory equipped leather saddlebags. Mounting brackets were designed and tested to meet the demands of a rigid mounted system, to assure optimum reliability. Installed on an FLSTC, this dual fishtail system gives your Heritage Classic the nostalgic appearance of American motorcycles of the 1950's era. Complete exhaust system includes heat shields, all necessary mounting brackets, hardware and instructions. AVAILABLE APRIL 1992. 65281-92 Fits all '89-'92 FXSTC, FXST Springer®, FLSTC and FLST Fat Boy® models

EVOLUTION® XL 1200 CYLINDERS

These cylinders are offered to complement the XL 1200 Piston Kit when upgrading an XL883/1100 to 1200cc specifications. They are bored and honed for 1200cc pistons so that the additional labor involved with boring the original XL883/1100 cylinders can be eliminated. Except for relieving the combustion chamber for correct compression ratio, these cylinders make the conversion to 1200cc a bolt-on operation. Each cylinder is unpainted to retain the original XL883 appearance. (Cylinders are sold separately. Two are required for the conversion.) 16554-92 Fits XL883/1100 when upgraded with the XL1200 Piston Kit. (Piston Kit P/N 16140-87.)

SCREAMIN' EAGLE® Adds to Twin Sports Racing Excitement

Harley-Davidson Twin Sports, the racing series exclusively for Harley-Davidson 883 Evolution® Sportsters® lived up to its billing in 1991 and delivered exciting, down-to-the-wire action to racing fans as promoted.

The addition of a point standings system, a move that turned Twin Sports into a true national championship series, made the 1991 season more exciting than ever.

Scott Zampach edged Tripp Nobles by only four points to take the series title. In fact, going into the season finale, the race for the championship was so tight that Zampach led Nobles by just one point. ■ A championship wasn't the only thing on the line for Twin Sports participants. Over \$50,000 in prize money was given out by season's end. Added to that total was an extra incentive from Screamin' Eagle. Screamin' Eagle provided contingency money at all 10 Twin Sports national races in 1991. Winners of those races received an extra \$150, second-place finishers \$100, and third-place finishers \$50. Congratulations to all Twin Sports participants who qualified for the Screamin' Eagle bonus. ■ Screamin' Eagle is continuing its support of Twin Sports in 1992. However, instead of awarding bonuses to the top three finishers of each race, contingency funds will be divided among the top five racers in the final point standings at the end of the year. ■ The involvement of Screamin' Eagle has contributed to the popularity of Twin Sports, which in just three years has gained recognition as a terrific, low-cost, entry-level racing series. Twin Sports appeals to both racing fans and racers alike because the strict technical rules that govern the series ensure competitive races. And, as far as the racers are concerned, those rules also keep racing costs down. ■ Key regulations include a virtual ban on engine modifications except for specified replacement .010 O.S. pistons, Screamin' Eagle High Flow Air Cleaner Kits, and free-flowing mufflers or exhaust systems. DOT-approved tires are required, and only specified components such as shock absorbers, fork springs and brake pads can vary from stock parts. ■ The series was created in 1989 by the American Motorcyclist Association exclusively for Harley-Davidson 883 Evolution Sportsters. Harley-Davidson became the official sponsor of the series in 1990. ■ For more information about Harley-Davidson Twin Sports, write the AMA/CCS at P.O. Box 447, Skyland, NC 28776, or call (704) 684-4297.

1992 SCREAMIN' EAGLE® DRAG RACING CONTINGENCY PROGRAM

1992 marks the fifth consecutive year in which Harley-Davidson will continue its support of drag racers through the Screamin' Eagle Contingency Program. Through 1991, over \$40,000.00 has been awarded to winner and runner-up finishers of selected professional and sportsman classes.

This year over \$1,200.00 of guaranteed contingency funds will be awarded at each of the seven drag race events listed. As in the past, a special \$50.00 bonus is available to winners/runners-up of selected classes for running a Screamin' Eagle carburetor.

For additional information on their complete 1992 drag racing schedules, including rules and regulations, contact AMRA* (American Motorcycle Racing Association) at (708) 250-0838 or ECRA* (East Coast Racing Association) at (609) 652-1159.

HIGH FLOW SCREAMIN' EAGLE® 40MM CARB & AIR CLEANER KITS

The Harley-Davidson® die-cast aluminum carb body with integral mounting flange features a large radius inlet and 40mm venturi for high air flow and increased horsepower throughout the RPM range, dual throttle cable linkage, accelerator pump, and a dyno tested fuel delivery system. An adjustable INTERMEDIATE FUEL CIRCUIT results in the elimination of any potential lean condition (also commonly referred to as surging).

Carb is equipped with the following jetting package: Slow Speed Fuel—68mm; Intermediate Fuel—60mm; Main Fuel—1.60mm; Intermediate Air—Blank. (Blank air jet is screw-in style and can be changed.)

Fuel curves can be fine tuned to your performance requirements by replacing jets. For a complete selection, refer to the chart.

Carb kits include high flow, washable air cleaner elements that provide excellent filtration, anodized aluminum backplates which attach to a unique injection molded 2-piece clamp system that bolts directly onto carb, a radiused venturi which increases air flow while minimizing turbulence. Kits listed are complete and include mounting hardware, support brackets, carb/manifold spacers, etc. and installation instructions. Refer to the individual model information for any additional parts required for installation when replacing CV (constant velocity style) carbs.

EVOLUTION® XL MODELS (pictured above)

Includes spacers and thru-bolts for installation on '91-'92 XL models equipped with cylinder head breather system. Includes oval backplate and high flow washable element designed to be used with stock production oval air cleaner covers, special short throttle cable for a cleaner installation, all necessary support bracketry, etc. NOTE: '88-'92 XL models also require 1987-style stock production manifold P/N 27004-86 for installation.

29081-80A Fits '86-'92 Evolution XL models

EVOLUTION® BIG TWIN 1340 MODELS (pictured below)

Includes round backplate and high flow washable element designed to be used with stock production 8" round air cleaner covers, separate carb spacers for stock or performance manifolds, cylinder head mount support brackets, etc. NOTE: '90-'92 1340 MODELS REQUIRE PERFORMANCE MANIFOLD P/N 29046-88A AND 1989-STYLE THROTTLE IDLE CABLES FOR PROPER CABLE FREE LENGTH COMPATIBILITY WITH CARBURETOR LINKAGE. HIGH PERFORMANCE SCREAMIN' EAGLE® II EVOLUTION® 1340 CAM KIT
The popular and versatile Harley Davidson® cam kit for Evolution 1340 models designed primarily as a solid lifter cam, but is compatible with hydraulic lifters. Camshaft profile offers the broadest power band of our Evolution 1340 product line when run with solid lifters. (Matched pistons required. See note below.) Complete kit includes solid lifter adapters (for late '85-later models), rigid chrome moly adjustable pushrods, steel lower collars and valve keepers, titanium upper collars, high revving XR-750 style inner and outer springs. To run solid lifters in '84-early-'88 models, solid lifter adapter kit P/N 85500-84 is required and must be purchased separately. (NOTE: Some late '84 thru early '86 engines require pistons to be notched to obtain necessary valve-to-piston clearance.)
25490-87 Fits Evolution 1340 models

PERFORMANCE BOLT-IN HYDRAULIC CAMSHAFT
Designed as a bolt-in alternative to your stock production camshaft for Evolution 1340 models. (Matched pistons required. See note below.) Offers longer duration on both intake and exhaust for greater peak torque and improved mid-range and top-end horsepower while being compatible with stock production springs, pushrods and lifters. Attains peak horsepower at 5800 RPM. NOT INTENDED FOR USE WITH SOLID LIFTERS. (NOTE: Some late '84 thru early '86 engines require pistons to be notched to obtain necessary valve-to-piston clearance.)
25487-87 Fits Evolution 1340 models

CAM/PUSHROD INSTALLATION KIT
This kit was designed to allow the installation of Screamin' Eagle or any other replacement cams and adjustable pushrods without removing cylinder heads or rocker boxes. PATENT PENDING.
25700-88 For use on all 1200/1340 single cam engines

FOR RACING APPLICATIONS ONLY.

ACCESSORIES

SLANT-STYLE LATIGO LEATHER SADDLEBAGS
Created by Harley® designers, these classic slant-styled saddlebags feature a fender yoke quick-disconnect system and are constructed from high-quality 8-9 oz. full grain Latigo leather. Full-penetration tanning process penetrates the dye throughout the leather, which helps minimize surface marring. In addition, special greases are hot-stuffed during tanning, providing internal lubrication and overall durability. A sturdy internal steel frame, combined with a reinforced bottom gusset, forms the structural foundation for these rugged and handsome bags. This reduces sagging and assures shape retention for years of use. To maximize the quick-disconnect feature, hidden carry straps add easy on/off practical convenience. It's a well-designed, long-lasting saddlebag system with genuinely useable capacity.

In addition to engineering aimed at durability, styling treatments include a contour that not only accommodates the shock absorber angle of Dyna Glide™ models, but also lends a classic, time-proven enhancement to Sportster® and FXR-Low Rider® models. Attention to detail abounds. The saddlebag tops are embellished with special trim straps that enhance appearance and are carefully stitched to parallel their overall slanted shapes. Beautiful die cast, nickel plated buckles incorporate a rich-looking flange with an attractive, cast-in "Harley-Davidson" USA™ graphic. Individually tailored yokes assure proper fitment on selected Harley-Davidson sport machines (sold separately, see below).

91010-91 Fits '82-later XL, FXR, and '91-later FXD Dyna Glide™ models when equipped with proper fender yokes (listed below) and Harley-Davidson Chrome Saddlebag Supports (listed on page 95)

NEW

Dunlop and Harley-Davidson® now offer a wider selection of tires, fine-tuned to meet our rider's needs. Some of the advantages of using Dunlop's NEW D401 and D402 designs on Harley-Davidson motorcycles are:

- A dramatic improvement in wet road performance due to a unique tread pattern which allows more continuous grooves for greater water dispersion without sacrificing tread element stability.
- New advanced casing offers greater stability across a wide range of speeds.
- Stress points around the circumference of the tire have been equalized through computer-aided design, minimizing cupping.
- The D402 provides an over 50% increase in rear tire mileage compared to the K291T due to the casing construction, tread pattern and tread compound.

Dunlop tires are the only brand of tires approved for fitment on Harley-Davidson motorcycles.
 NOTE: Harley-Davidson dealer service bulletin M1019 contains the latest recommended tire fitment information for Harley-Davidson motorcycles.

WIDE WHITEWALL TIRES

To satisfy growing demands for a wide whitewall, Harley-Davidson and Dunlop have worked together to develop these nostalgic D402 tires. Rigorously tested, they combine the latest in tire technology with a look so popular today. Available exclusively at authorized Harley-Davidson dealers. Fits Heritage Softail® models and all other models equipped with D402 tires. See your dealer when choosing tires to ensure proper fitment.

99886-84 Gallon.

SPORTTRANS FLUID—Special formula gear and chaincase lubricant for use in all '71 and later XL and XR models.

99896-88 One Quart.

99895-88 Gallon.

SOME FACTS YOU SHOULD KNOW ABOUT GENUINE SEMI-SYNTHETIC TRANSMISSION LUBE AND SPORTTRANS FLUID.

These unique products were developed specifically for Harley-Davidson® transmissions to provide superior lubrication. Consider these unique performance features:

Maintain Viscosity (doesn't thin out)

Conventional gear lubes or motor oils can actually be "sheared" by the high-speed action of the drive gears. The result is a loss of viscosity or "thinning out" in service and high wear of the gear teeth. Genuine Transmission Lube and Sport-Trans Fluid are designed to withstand this shearing action and maintain viscosity indefinitely.

Superior Lubrication over a Wide Temperature Range

These unique fluids are not affected by changes in temperature as much as conventional gear lubes or motor oils.

Fight Corrosion and Wear

Genuine Transmission Lube and Sport-Trans Fluid contain special additives to protect against rust and corrosion. They also contain potent high film-strength anti-wear additives to handle the heavy loads of the drive gears.

WHEEL BEARING GREASE

A heavy-duty, high temperature grease that provides excellent resistance to water wash-out and maintains lubricating qualities after extended use. Recommended for wheel bearings, steering head bearings, and rear swing-arm bearings.

MAINTENANCE

S100® SPECIAL PERFORMANCE WHEEL CLEANER

Similar to S100 cycle cleaner but specifically formulated to combat brake dust, road soils, and chain lube which can bake on to your alloy wheels from the heat of braking. Special gel formula stays where you spray it for super cleaning power. Does not contain any acids or lyes which can damage your wheels, like most competitive wheel cleaners. 500 ML bottle with sprayer.

S100® CORROSION PROTECTANT

S100 Corrosion Protectant is formulated to protect your motorcycle from damaging corrosion often caused by rain, salt air, and neglect. Easy to use — just spray on, then rub with a dry cloth to a high shine. Works great for aluminum and other metals, as well as plastic and rubber parts.

S100® TOTAL CYCLE CLEANER

An entirely new technology for cleaning today's high performance cycles. It provides superior cleaning without resorting to harsh chemicals or solvents which can leave a dirt-attracting film or damage sensitive surfaces.

GENUINE MOTORCYCLE OIL — HD 240
 Harley-Davidson® Genuine Motorcycle Oil is the only oil developed exclusively for your Harley® by the people who know your engine best: Harley-Davidson engineers. Years of research and over a half million miles of road testing have proven it to offer superior performance in our 4-stroke, air-cooled V-Twin engines. Developed by the experts who really understand your Harley, Harley-Davidson Motorcycle Oil features special additives to keep valves from sticking and to prevent oil breakdown at high temperatures. That means smoother performance, reduced maintenance and longer engine life than you'd get with ordinary oils.

So see your Harley-Davidson dealer now, and improve your Harley's performance with one oil change — to Harley-Davidson Genuine Motorcycle Oil.

Quarts or gallons. SAE 10W40, SAE 20W50, SAE 50 and SAE 60.

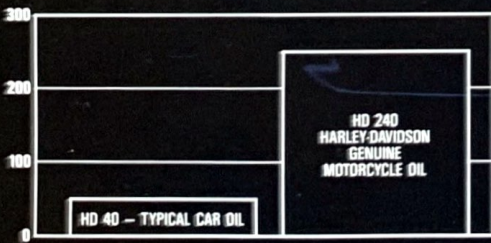

HD® RATING

Harley-Davidson engine rating (HD 240™) represents the number of hours under the Harley-Davidson oil test that engines run before they cease to meet minimum specifications.

Average of 3 test engines. Testing 24 hours per day, 55 minutes specified load and speed, with 5 minutes idle, each hour.

The continuous test hours used as the basis for the Harley-Davidson oil rating system should not be taken as an indication of the number of hours any other engine, other than the test engines, would run. The test engines were set up and run under controlled conditions of environment, load, running clearances, fuel quality and oil cleanliness and were used for comparative oil evaluation test purposes.

When creating your own custom masterpiece using Genuine Harley-Davidson® accessories, don't forget to include the ultimate finishing touch... a Genuine Harley-Davidson Custom Paint Job. Whether you're considering upgrading your early model motorcycle or you want your brand new 1992 model to truly be a one-of-a-kind piece of art, Custom Paint is for you.

Have us strip and repaint your existing tanks and fenders, or if you prefer, we can supply a complete new factory fresh set. Either way you can be assured of a hand-painted, hand striped paint scheme that is as rugged and durable as it is beautiful.

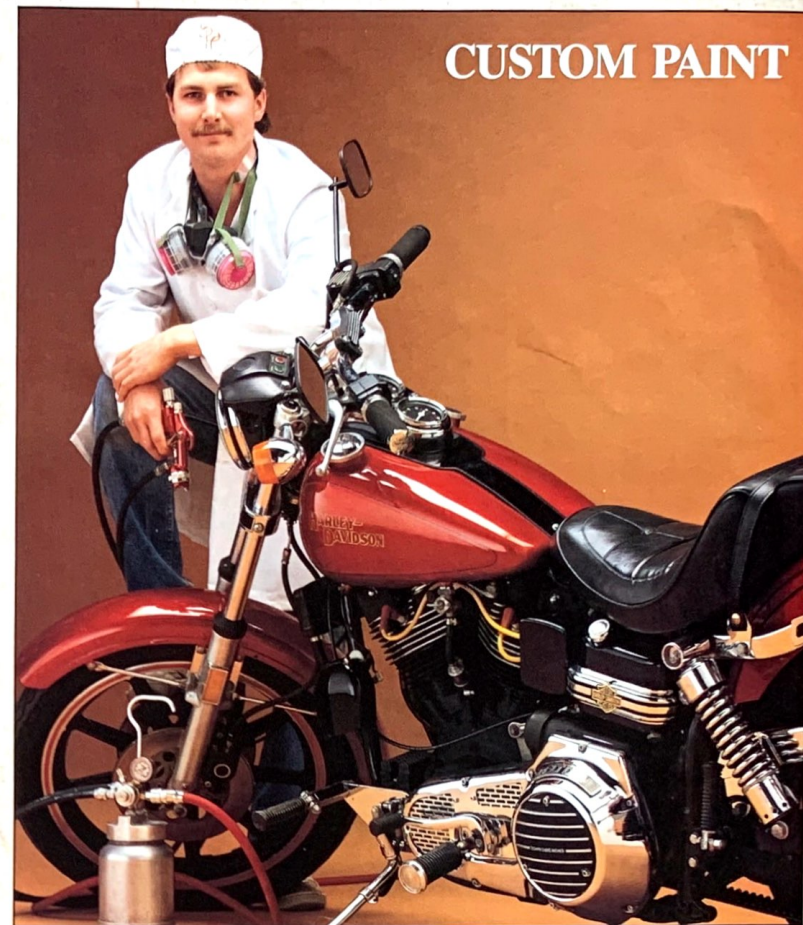

With over 50 candy and pearl colors, plus hundreds of automotive colors, you can create your own personal custom statement of single or two-tone color combinations, with striping and decals of your choice.

If you're not quite ready for a complete new custom paint job, but need to have an individual tank or fender repainted to match your stock production paint scheme ('86-'91 only) we can supply it in the correct color, striping, and decal configuration. So breathe some new life into your motorcycle... the Genuine Harley-Davidson way.

NOTES:
 CUSTOM PAINT PROGRAM DOES NOT APPLY TO FIBERGLASS AND ABS PLASTIC PARTS. INCLUDES PAINTING ONLY (TANKS AND FENDERS MUST BE PURCHASED SEPARATELY, IF NEEDED). SEE YOUR HARLEY-DAVIDSON DEALER FOR COMPLETE DETAILS ON AVAILABLE OPTIONS AND PRICING.

SUPPLY OF THESE CUSTOM PAINTED PARTS MAY VARY DEPENDING ON SEASONAL DEMAND LEVELS. SEE YOUR DEALER FOR FURTHER DETAILS.
